2, life camp, Gwarinpa, Abuja, 900108, NG | +2347085531738

Dynamic front-end developer with expertise in TypeScript, React, Next.js, Vue, and MongoDB. Proficient in crafting responsive, user-centric applications that prioritize performance, accessibility, and SEO. Committed to delivering scalable code that enhances digital experiences and effectively engages users.

## Work Experience

### Frontend Developer
*Boorook HR | Abuja Nigeria*

Jul 2024 - Present

- Developed the Boorook website for a client based on a detailed Figma design, ensuring pixel-perfect implementation.
- Built responsive layouts that remained consistent across differ ent devices and screen sizes.
- Optimized the site for performance, improving load times and animation fluidity.

### Freelance Project – Pixel-Perfect UI

Aug 2025 - Aug 2025

- Delivered a responsive and visually accurate interface tailored to client requirements.
- Developed a responsive, pixel-perfect user interface using Next.js and TypeScript.
- Ensured a fle xible design optimized for both desktop and mobile devices.

### Job Tracker Chrome Extension
*Swiftcareer | Abuja Nigeria*

Jan 2025 - Jul 2025

- Developed a Chrome extension("swiftcareer" in Chrome website), Extension that scrapes job details from our supported job sites and automatically saves them to the Job Tracker board.
- Designed to help job seekers track their applications efficiently , improving their job search management.
- Implemented data persistence and synchronization, allowing users to access their saved job listings across devices.

## Projects

### AI-Powered Content Creation App

Present

Designed and developed an application that streamlines social media content generation through AI and automation.

- Built with Next.js, TypeScript, and Node.js for scalable full-stack development.
- Allows users to input post ideas, schedule posts by day, and toggle hashtags and images.
- Integrated Google Gemini and Unsplash API to automate text and image creation.
